Curriculum Vitae

Annemieke Roos was born on May 11th 1973 in Abidjan, the Ivory Coast. She was raised in Gorinchem, where she graduated from the Gymnasium Camphusianum in 1991. The same year she started her study at the Medical School of the Erasmus University in Rotterdam. As a medical student she spent her electives in Endocrinology in Uppsala, Sweden, and Barcelona, Spain, which triggered her interest for endocrinology. After graduating in 1999, she soon started her specialist training in General Internal Medicine in the “Zuiderziekenhuis,” Rotterdam (currently named Maastad Hospital), under the supervision of Dr. A. Berghout. Together with him, she started the research described in this thesis. She moved to the city of Groningen in 2003 where she continued her training in Internal Medicine at the University Medical Centre Groningen (supervisor Prof. dr. R.O.B. Gans). She completed this training as well as her subspecialty training in Endocrinology (supervisor Prof. dr. B.H.R. Wolffenbuttel) in 2006. During this time she continued her research with Professor Wolffenbuttel which lead to this thesis. She worked as a “chef-de-clinique” in Almelo from 2007 until 2011, following which she moved back to Groningen to work as Consultant Endocrinologist in the Martini Hospital where she is a partner in the “Practice of Internal Medicine and Rheumatology.” Annemieke is married to Lars van der Ham. Together they have four sons: Ole (2004), Flo (2006), Maas & Roef (2009).
